SUMMARY

Passionate Game Designer & Developer skilled in Unity and Unreal Engine with experience in crafting 2D and 3D games. Strong in gameplay mechanics, level design, and interactive storytelling, with projects completed for game jams, expos, and personal initiatives. Focused on delivering engaging player experiences through thoughtful design and iteration.

TECHNICAL SKILLS:

- **Game Engines:** Unity (C#), Unreal Engine (Blueprints & Basic C++)
- **Scripting:** C#, Python, Object-Oriented Programming (OOP), Design Patterns, Shaders
- **Game Design:** Level Design, System Balancing, Narrative Design, Enemy AI, Interaction System.
- **Documentation:** Game Design Documents (GDD), Feature Specs, User Flows.
- **Design:** Level Design, System Balancing, Narrative Design, Game Design Documentation
- **Tools & Technologies:** Git, Visual Studio, AI-Assisted Development (ChatGPT, GitHub Copilot, Claude, Gemini)

EXPERIENCE

Game Development Intern – Particle14 Infotech Pvt. Ltd (June 2026 - Sept 2026)

- Developed and optimized Unity gameplay systems using C#, focusing on interactive mechanics, debugging, performance improvements, and clean code practices. Worked on the Color Block Run game under mentorship, contributing to gameplay implementation and refinement.

Game Development Intern – Arkham Archives (December 2025 - January 2026)

- Contributed to the development of gameplay systems and interactive mechanics, implementing engine-based features and optimizing core modules. Performed debugging, performance profiling, and iterative refinements to enhance system stability and gameplay responsiveness within structured development cycles

Game Development Intern (Unity) – Mayaavi Interactive (September 2025 - December 2025)

- Designed and implemented playable levels in Unity, integrating 3D assets and developing gameplay systems using C#. Built and optimized character behaviors, animation workflows, and interactive mechanics while maintaining performance and code structure standards.

PROJECTS

The Legend of Indra vs Vritrasur (*December 2024 – Present),* ***Role*** *- Game Designer & Game Developer*

- Designed combat systems, enemy AI, and narrative flow for an Unreal Engine action-adventure RPG with 3D immersive support. Balanced gameplay and progression through iterative playtesting.

It's Me Pico (*January 2026 – May 2026),* ***Role****- Game Designer & Game Developer*

- Developed and publisheda territory-control game on GooglePlay, implementing playercontrols, AI opponents, scoring mechanics, and tile-coloring gameplay using Unity and C#.

Reality Run **(***January 2026 – January 2026),* ***Role****- Game Designer & Game Developer*

- Created a Third person shooter game similar to escape room during **Global Game Jam 2026**, implemented an alertness level detector, Dynamic menus, Interaction system and more.

BubbleBoom **(***January 2025 – January 2025) ,* ***Role****- Game Designer & Game Developer*

- Built a 2D Unity shooting game during **Global Game Jam 2025**, implementing bubble-shooting mechanics, chain reactions, and progressive difficulty within a 48-hour sprint.

The Shooter **(***February 2024 – May 2024),* ***Role****- Game Designer & Game Developer*

- Developed a Unity-based FPS featuring advanced movement, multi-weapon combat, and decal-based effects. Implemented modular animations and refined AI, pacing, and player mechanics.

EDUCATION

CHANDIGARH UNIVERSITY *Gharuan, Punjab / India*

BE CSE(GRAPHIC & GAMING); CGPA-7.51; 2022- June 2026

Achievements:

- *Won 1st and 3rd Prize for Our Game at Institute and Cluster level in CU Projects Expo 2025.*
- *Won 3rd Prize in Global Game Jam 2025.*
- *Won Award for Best Gameplay Factor in Global Game Jam 2026.*

LANGUAGES: English (Fluent), Hindi (Native)
